

Urban Personal Transport Tricycle

This tricycle is designed for urban or personal transportation. It features an enclosed cabin with a single front wheel and two rear wheels.

Overview

Urban Personal Transport Solution

The Urban Personal Transport Tricycle offers a compact and efficient solution for personal mobility in densely populated city environments. Featuring an enclosed cabin, this vehicle provides protection from the elements while maintaining high maneuverability. Its three-wheeled design balances stability with the ease of navigation required for urban commuting.
