

Urban Scooter Motorcycle with Step-Through Frame

This scooter motorcycle is designed for urban transportation with a step-through frame. It features integrated headlights and an optional rear storage box.

Overview

Modern Urban Mobility

This urban scooter motorcycle features a convenient step-through frame design, making it highly accessible and easy to mount for daily commuting. Its modern aesthetic combines curved and angular body panels, resulting in a sleek, professional appearance suitable for city environments. Equipped with essential features like a rear storage box and reliable front disc brakes, this vehicle is engineered for both practicality and recreational use.
