

Urban Waste Collection Truck with Front Loader

This refuse collection truck is designed for urban environments. It features a front-loading mechanism and a rear compactor for efficient waste management.

Overview

Urban Waste Management Solution

This refuse collection truck is specifically engineered for high-efficiency urban waste management. Featuring a robust front-loading mechanism and a reliable container body, it provides a practical solution for navigating dense city environments. Its dual-axle configuration and heavy-duty tires ensure durability and stability during intensive collection cycles.

Technical Specifications
