

USB-C and USB-A 13-in-1 Universal Laptop Docking Station

This universal laptop docking station features both USB-C and USB-A ports for wide compatibility. It supports triple 4K displays and provides up to 100W power delivery.

Overview

Universal 13-in-1 Hybrid Docking Station

This versatile 13-in-1 hybrid docking station is engineered to bridge connectivity gaps for both USB-C and USB-A host devices. Supporting triple 4K display configurations through MST technology, it provides high-speed data transfer and efficient workspace management. With up to 100W power delivery and a comprehensive array of ports including Gigabit Ethernet and audio connectivity, it serves as an ideal central hub for professional workstations.
