

USB Flash Drive

This USB flash drive provides portable storage for various digital files. Its compact design allows for easy transport and convenient data transfer between devices.

Product Overview

Clinical Applications

This product contains a combination of Cefalexin and Trimethoprim, formulated for the effective treatment of bacterial infections. Cefalexin acts as a cephalosporin antibiotic, while Trimethoprim functions as a dihydrofolate reductase inhibitor to provide a synergistic antibacterial effect. Each unit contains 50 capsules, ensuring a sufficient supply for standard treatment protocols.
