

USB Interactive Whiteboard System with Digitizing Tablet

This interactive whiteboard system utilizes a USB connection for seamless integration with computers. It includes a digitizing tablet and stylus, enabling users to write, draw, and interact with digital content directly on the tablet surface.

Product Overview

Interactive Digital Collaboration System

This USB-powered interactive whiteboard system provides a versatile solution for presentations, education, and professional collaboration. By integrating a responsive digitizing tablet and precision stylus, it allows users to write, draw, and manipulate digital content in real-time. The system is designed for simple plug-and-play connectivity, ensuring seamless integration with existing computer environments.
