

USB Powered Multimedia Speakers

These multimedia speakers deliver clear, balanced audio for computers and audio devices. Their compact design is ideal for desktops where space is limited.

Product Overview

Compact Multimedia Audio Solution

These multimedia speakers are designed to deliver clear and balanced audio, making them an excellent choice for desktop environments with limited space. Powered conveniently via USB, they eliminate the need for bulky external power adapters, while the standard 3.5mm audio jack ensures broad compatibility with various devices. Featuring an intuitive front-panel volume control, these speakers provide a user-friendly experience for gaming, music, and general multimedia applications.
