

USB Type-A to Type-B Cable

This USB cable features a Type-A connector on one end and a Type-B connector on the other. It is designed for data transfer and power delivery between devices.

Product Overview

Professional Data Connectivity

This USB Type-A to Type-B cable is engineered for reliable data transmission between computers and a wide array of peripherals. It serves as a standard high-compatibility solution for devices including printers, scanners, digital cameras, and modems. Designed to ensure stable performance, the cable supports the essential input-output interface requirements for modern office and studio equipment.

Technical Specifications

Compatibility

- Printers
- Scanners
- External CD-ROM Drives
- Digital Cameras
- Computer Peripherals
- Modems

Connector Interface

USB Type-A, USB Type-B
