

# Used Industrial Piston Air Compressor for Mining

This is a used piston air compressor designed for mining and industrial applications. It provides compressed air for pneumatic tools, machinery and other industrial applications.

## Overview

### Industrial Piston Air Compressor

This robust, used piston air compressor is engineered for demanding mining and industrial environments. Featuring a multi-cylinder compressor unit powered by a reliable diesel engine, it provides consistent compressed air for heavy-duty pneumatic tools and machinery. The unit is mounted on a portable wheeled chassis, making it a versatile solution for site-specific operations requiring mobility.

## Technical Specifications

Power Source	Diesel Engine
Compressor Design	Multi-cylinder Piston
Portability	Yes

## Safety & Features

Safety Features	Pressure Regulator, Safety Valves, Air Filters
-----------------	--

## Condition

### Equipment Status

Used • Well-maintained
