

Used Industrial Piston Air Compressor for Mining

This is a used piston air compressor designed for mining and industrial applications. It provides compressed air for various pneumatic tools and equipment.

Overview

Industrial Piston Air Compressor

This used industrial piston air compressor is built for heavy-duty applications in mining and manufacturing environments. Featuring a robust design with a stable, mounted base, it is engineered to provide reliable compressed air for pneumatic tools and equipment. The unit includes essential integrated fittings and pressure monitoring systems to ensure operational efficiency.

Technical Details

Condition

Used • Industrial Grade

Model Type

W1.5/4

License Certification

XK06-010-0432

Recommended Applications

Mining, Pneumatic Tools, Industrial Manufacturing

Construction

Design Features

- Robust piston compressor architecture
- Integrated electric motor
- Multi-tank air storage system
- Integrated pressure gauge
- Heavy-duty mounted base
