

Used Industrial Pump

Industrial-grade pump designed for fluid transfer. It is suitable for applications such as drainage and irrigation.

Overview

Industrial Pump Inventory

This inventory features a selection of high-performance industrial pumps, including boiler feed, emergency fire, and vacuum pump configurations. These units are available in both used and reconditioned states, offering robust iron and copper casing options for various marine and industrial applications. Each unit comes equipped with compatible motor specifications to ensure reliable operation for fluid transfer and pressure maintenance tasks.

Inventory Details

Available Pump Models

Model	Type	Casing Material	Status
EB2H-50	Horizontal Boiler Feed	Iron	Used
EB2H-65	Boiler Feed Water	Iron	Used
FBCV-250	Emergency Fire	Copper	Used
FBSV-200	Vertical Fire & Ballast	Iron	Reconditioned
VK-20	Vacuum	Copper	Reconditioned

Condition Status

Used • Reconditioned

Technical Specifications

Key Performance Metrics

200 m³/h
Max Flow Rate

145 m
Max Total Head

100 kw
Max Power Output

Motor Characteristics

440V, 60Hz, 3500 RPM, Industrial Grade
