

Used Laptop with Screen Display Issue

This is a used laptop that has a screen display issue characterized by vertical lines. The laptop features a standard keyboard layout and a touchpad.

Product Overview

Device Condition and Status

This pre-owned laptop is being offered in its current condition, noting a specific display issue characterized by vertical lines or bands across the screen. The unit includes a standard keyboard layout and integrated touchpad. Given the display defect, this device is best suited for professional buyers looking for components, parts, or repair projects.
