

Used Piston Air Compressor for Mining Applications

This is a used piston air compressor designed for mining and industrial applications. It includes a large electric motor, twin compressor cylinders, and an air tank mounted on wheels.

Overview

Robust Compressed Air Solution

This used piston air compressor is engineered for demanding mining and industrial environments where reliability is paramount. Featuring a robust twin-cylinder design and a large electric motor, it delivers consistent pneumatic power for heavy-duty applications. Mounted on a wheeled chassis, this unit offers essential portability, allowing operators to maneuver it easily across job sites as needed.

Technical Specifications

Mobility

Wheeled Chassis • Portable

Configuration

- Twin compressor cylinders
- Large electric motor
- Integrated air tank
- Pressure monitoring gauges and valves

Compressor Type	Piston
Primary Applications	Mining, Industrial, Heavy-duty
Condition	Used
