

Utility Electric Tricycle with Cargo Bed

This tricycle is designed for utility purposes and features a cargo bed at the rear. It is equipped with a windshield, headlight assembly, and electric motor, making it suitable for transporting goods in urban or industrial environments.

Overview

Versatile Urban Cargo Utility

This electric utility tricycle is engineered for efficient goods transport in urban and industrial environments. It features a robust metal-framed cargo bed and a stable three-wheel design, ensuring reliability under load. With an integrated electric motor and user-friendly controls, it offers a sustainable and practical solution for last-mile logistics.

Technical Specifications

Drive System	Electric Motor
Wheel Configuration	Single front wheel, dual rear wheels

Design Features

Key Features

- Rear cargo bed with metal frame
- Integrated windshield assembly
- Front headlight system
- Accessible battery compartment

Application	Urban Transport, Industrial Logistics, Goods Delivery
