

Utility Space Heater with Tip-Over Protection

This space heater features heavy-duty metal construction for durability. It includes a tip-over protection device and overheat safety shutoff for added safety.

Overview

Robust Utility Heating Solution

This utility space heater is engineered for reliable performance in demanding environments like garages, workshops, and utility areas. Featuring a durable metal housing and a protective front grill, it provides consistent heat distribution where you need it most. With adjustable settings and integrated safety features, it offers a practical and secure heating solution for professional and household use.
