

Utility Task Vehicle

This utility vehicle is designed for various applications, offering a practical solution for transportation and light-duty tasks. It features a cargo area for carrying materials or equipment and a canopy for shade and protection from the elements.

Overview

Versatile Utility Task Vehicle

This utility vehicle is designed for various industrial and commercial applications, offering a highly practical solution for internal transportation and light-duty tasks. It features a robust, compact design built for durability in demanding environments like warehouses, factories, and resorts. Equipped with a cargo bed and protective canopy, it balances operator comfort with functional utility for daily operations.

Key Features

Suitable Environments

Warehouses, Factories, Resorts

Technical Details

Construction Highlights

- Integrated cargo bed for material transport
- Protective canopy for weather shielding
- Compact maneuverable design
- Durable heavy-duty construction

Operating Surface

Paved Surfaces • Smooth Ground
