

UTP CAT5e/CAT6 LAN Cable

This LAN cable supports both CAT5e and CAT6 standards for reliable data transmission. Its unshielded twisted pair (UTP) construction minimizes interference in indoor installations.

Product Overview

High-Performance Indoor Connectivity

This high-performance indoor LAN cable is engineered for reliable data transmission in both home and office environments. Designed to support CAT5e and CAT6 standards, it ensures optimal compatibility and high-speed connectivity for a wide range of networking applications. The unshielded twisted pair (UTP) construction provides a cost-effective solution for efficient signal transfer, making it an ideal choice for connecting computers, routers, and other essential network devices.

Technical Specifications

Environment

Indoor

Primary Applications

- Computer networking
- Router connectivity
- Office LAN installations
- Home network setups

Cable Type

UTP (Unshielded Twisted Pair)

Supported Standards

CAT5e, CAT6
