

UV Flatbed Printer with Toshiba CE4M Print Heads

This flatbed printer is equipped with Toshiba CE4M industrial print heads for high-precision printing. It utilizes UV-curable ink technology to produce vibrant and long-lasting prints on a variety of materials.

Overview

Industrial Precision Printing

The UV2513 is a high-precision flatbed printer designed for industrial-grade performance across diverse rigid substrates. Utilizing advanced UV-curable ink technology and variable droplet control, it delivers vibrant, durable prints with smooth gradients and fine detail. Built for reliability and safety, this versatile solution is ideal for high-quality output in signage, display graphics, and specialized industrial packaging applications.

Technical Specifications

Print Head Model	Toshiba CE4M
Printing Technology	UV-curable ink with variable droplet technology
Compatible Materials	Acrylic, Glass, Wood, Metal

Features

Safety Systems

- Emergency stop buttons
- Operational interlocks
- Advanced ink management

Applications

Recommended Applications

Signage • Display Graphics • Packaging • Industrial Printing
