

UV Gel Nail Curing Lamp

This UV lamp is designed for curing nail gels and other UV-sensitive materials. It features a durable plastic housing and a user-friendly interface with timer settings.

Product Overview

Advanced UV Gel Curing Technology

This high-performance UV lamp is designed with durability and precision curing in mind. It utilizes a patented arc-shaped tube arrangement to ensure full light utilization, providing superior baking results for all five fingers simultaneously. Built with premium aviation aluminum reflectors and high-grade imported plastic housing, this unit is engineered for long-term reliability in professional salon environments.

Technical Specifications

Technical Comparison

Feature	This Product	Typical Alternative
Control Plate	Automatic Chip Mounter	Manual Plug-ins
Socket Type	Multi-point Contact	Flake Structure
Tube Layout	Arc Shape (Patented)	Left-Right Facing
Fuse Design	Embedded/Safe	External/Loose

Material & Construction

Design Features

- Pure white UV-resistant exterior
- Embedded fuse safety structure
- Clean-finish baseboard
- Arc-array light distribution

Material Composition

Aviation Aluminum Reflector, Imported UV-Resistant Plastic, High-Viscosity Bonding
