Product Overview

Deep Cleaning Technology

This UV light mattress cleaner is engineered to provide a hygienic sleeping environment by targeting dust mites and allergens. It utilizes a sophisticated composite rolling brush mechanism that works in tandem with a patting action to loosen and extract deeply embedded particulates. Designed for both efficacy and ease of use, this tool is an essential solution for maintaining mattress cleanliness and reducing household allergens.

Key Features

Cleaning Mechanisms

- Composite rolling brush
- Deep-action patting function
- UV light sanitization

Design Highlights

Ergonomic Design, Compact, Transparent Dust Container

Performance Metrics

Primary Function

Dust Mite Removal • Allergen Removal • Bacteria Sanitization
