

# UV Light Shoe Sterilizer

This shoe sterilizer uses UV-C light technology to disinfect and eliminate bacteria and odors. It features a built-in timer for automated operation and a rechargeable battery for cordless use.

## ADDITIONAL IMAGES

## Product Overview

### Professional Footwear Hygiene Solution

This portable UV light shoe sterilizer is designed to maintain footwear hygiene by combining thermal drying and advanced light-based sterilization. It effectively combats bacteria and odors using a multi-stage approach involving UV-C and UV-A light alongside an integrated anion system. With multiple operational modes, it provides a convenient and thorough disinfection process suitable for various shoe types.
