Product Overview

Professional Surface Sanitization

This compact UV sanitizing vacuum cleaner is specifically engineered to improve indoor hygiene by targeting dust mites, bed bugs, and harmful bacteria. Its ergonomic handheld design allows for precise cleaning on delicate surfaces such as mattresses and upholstery. By combining UV sterilization with powerful suction, it offers an effective solution for maintaining a cleaner, healthier living environment.

Key Features

Technologies

UV Sterilization, Dust Mite Removal, Bacterial Elimination, Allergen Reduction

Design and Handling

Design Highlights
