

# UV Sterilization Lamp for Surface and Air Disinfection

This UV sterilization lamp is designed for surface disinfection and air purification. It utilizes ultraviolet radiation to eliminate bacteria, viruses, and other microorganisms.

## ADDITIONAL IMAGES

## Product Overview

### Professional-Grade UV Sterilization

This high-efficiency UV sterilization lamp is designed for both surface disinfection and air purification, providing a reliable solution to eliminate bacteria and viruses in indoor environments. Featuring a robust cylindrical design with a protective metal frame, it ensures safety during operation while delivering consistent UV-C radiation. It is an ideal choice for maintaining hygiene standards in homes, offices, and commercial settings.

## Key Metrics

### Core Features

**1 Surface & Air**  
Primary Application

**1 Cylindrical**  
Design Type

## Technical Specifications

Power Source	Electrical
Operation	Manual Control Panel

## Application & Usage

### Sanitization Methods

- Surface Disinfection
- Air Purification

Recommended Environments	Homes, Offices, Indoor Commercial Spaces
