Product Overview

Professional-Grade UV Sterilization

This versatile UV sterilization lamp offers powerful disinfection capabilities suitable for various professional and residential environments. With multiple power options and advanced safety features like radar human induction and a 30-second delayed start, it ensures effective sterilization while prioritizing user safety. The unit supports convenient remote operation and integrates seamlessly with smart home ecosystems.

Technical Specifications

Power Ratings

38 W Option 1	65 W Option 2	100 W Option 3
-------------------------	-------------------------	--------------------------

Electrical Requirements

Parameter	Value
Voltage	110V/220V ~ 50/60Hz
Electric Current	450mA / 600mA

Radiation Wavelength	1600nm, 1850nm
----------------------	----------------

Operational Features

Remote Control Features

- 20M control distance
- Wall penetration capability
- 15/30/60 Minute timer settings
- 30-second delayed start

Smart Home Support

Google Home • Amazon Echo

Safety & Design

Safety Mechanisms

Infrared human induction, Radar sensor, Delayed start, No UV shining during operation

Ozone Function

Yes
