

V-Belt Air Compressor 0.07 m³/min 8 bar 30L

This V-belt air compressor is designed for pneumatic tasks. It delivers consistent air pressure with a 0.07 m³/min displacement, 8 bar maximum pressure, and a 30-liter tank.

Product Overview

Professional V-Belt Driven Air Compressor

This V-belt driven air compressor is engineered for consistent and reliable performance in demanding professional environments. It features a robust 30-liter air tank and a durable motor designed to deliver a stable airflow of 0.07 m³/min. With built-in safety features like thermal overload protection and a pressure relief valve, this unit provides both power and peace of mind for pneumatic tasks.

Technical Performance

Air Displacement

0.07 m³/min

Air Displacement

Maximum Pressure

8 bar

Physical Specifications

Tank Capacity

30 L

Features

Equipment Features

- V-belt drive system
- Integrated thermal overload protection
- Pressure relief safety valve
- Portable design with wheels and handle

Application Compatibility

Professional Use, Industrial Use, Pneumatic Applications
