

V-Belt for Stone Cutting Machines

This V-belt is designed for efficient power transmission in stone cutting machines. It is constructed from durable materials to ensure a long lifespan and reliable performance.

Product Overview

High-Performance V-Belt for Stone Machinery

This precision-engineered V-belt is specifically designed for the demanding operational requirements of stone cutting machines. Built with high-durability materials, it ensures efficient power transmission and provides consistent, reliable performance under heavy-duty conditions. Its robust construction offers superior resistance to wear and tear, effectively extending the service life of your equipment.

Technical Specifications

Belt Profile	B-40
Belt Dimensions	11mm x 10mm
Length Specification	1120 mm

Key Features

Performance Metrics

100 %

Power Transmission Efficiency

1 High

Wear Resistance Grade

Application Compatibility	Stone Cutting Machines, Industrial Machinery, Heavy-Duty Drives
