

V-Groove Wood Router Bit

This V-groove router bit is designed for creating V-shaped grooves in woodworking. It is suitable for engraving, lettering, and decorative grooving in various wood materials.

Product Overview

Precision V-Groove Router Bit

This high-performance V-groove router bit is engineered for precision woodworking applications, including detailed engraving, lettering, and decorative grooving. Designed to produce clean, sharp V-shaped cuts, it is an essential tool for creating intricate designs in various wood materials. Its robust construction ensures durability and consistent results for professional workshop projects.

Technical Specifications

Design Features

- V-shaped geometry for sharp profiles
- Optimized for precision cutting
- Suitable for diverse wood types

Cutting Angle (2α)	90 degrees
Primary Applications	Engraving, Lettering, Decorative Grooving, Woodworking
