

V-Twin 37 HP Gasoline Engine

This V-twin gasoline engine delivers 37 HP for a variety of power generation applications. Its robust design ensures reliable performance at 3600 rpm, making it suitable for generators, pumps, and other industrial equipment.

Overview

High-Performance V-Twin Engine

This 37 HP V-twin gasoline engine is engineered for demanding industrial and power generation applications. Featuring a 4-stroke, forced air-cooled design, it balances robust power output with efficient operation. With an electric start system and durable construction, it provides a reliable power source for heavy-duty equipment.

Performance

Max Power Output

27 kW

Max Power

3600 rpm

at RPM

Max Torque

71 N.m

Recommended Power

24 kW

Technical Specifications

Engine Configuration	V-Twin Cylinder, 4-Stroke, Forced Air-Cooled
Displacement	999 ml
Bore x Stroke	90 x 78.5 mm
Compression Ratio	8.5:1
Ignition System	Non-contact transistorized ignition (TCI)
Fuel Consumption	370 g/kW.h
Engine Oil Capacity	2.3 L

Logistics

Container Loading Capacity

Container Type	Quantity
20GP	96
40GP	201
40HQ	268

Carton Dimensions 705 x 570 x 650 mm

Dry Weight 60 kg
