

Vacuum Brake Booster

This is a vacuum booster designed to enhance braking performance. It uses engine vacuum to multiply the force applied to the master cylinder.

Overview

High-Performance Vacuum Brake Booster

This vacuum brake booster is a critical component designed to enhance braking efficiency by utilizing engine vacuum to multiply the force applied to the master cylinder. Engineered for reliability and precision, it ensures consistent pedal feel and responsive braking performance. This unit is specifically compatible with the Belina vehicle application, making it an essential replacement part for maintaining optimal vehicle safety.

Technical Specifications

Item Number	6433
OE Numbers	89EU2055AA, BE1M2005B, BF0E2005A

Compatibility

Application	BELINA
