

Vacuum Brake Booster

This vacuum brake booster enhances braking performance by reducing the effort needed to apply the brakes. It uses vacuum to amplify the force applied to the brake pedal.

Product Overview

High-Performance Vacuum Brake Booster

This vacuum brake booster is engineered to significantly reduce the physical effort required to apply the vehicle's brakes. By utilizing engine vacuum, it amplifies the force applied to the brake pedal, ensuring consistent and responsive braking performance. Designed for durability and precision, this unit is a critical component for vehicle safety and control.

Technical Specifications

OE Number	2110-3510010
Diaphragm Configuration	Single Diaphragm
Booster Size	8 inch

Compatibility

Compatible Models	VAZ 2110, VAZ 2112
