Product Overview

High-Efficiency Vacuum Brazed Diamond Saw Blade

This vacuum brazed diamond saw blade features a high concentration of exposed diamond grains, ensuring sharp and fast cutting performance. Engineered for energy conservation and environmental friendliness, the advanced vacuum brazing technology significantly improves work efficiency and extends the tool's operational lifespan. It is designed as a general-purpose solution for cutting a wide range of materials including stone, metal, and masonry.

Technical Specifications

Diameter Range	12 to 20 inches
Diamond Grit Options	36-60, 80-120

Performance Features

Key Features

- High degree of exposed diamond grains
- Fast cutting speed
- Energy-efficient design
- Extended service life
- Environmentally friendly manufacturing

Material Compatibility

Material Application Guide

Category	Materials
Masonry & Construction	Concrete, brick, block, stone
Glass	Flat, frosted, sandblasted, embossed, wired, hollow, laminated, glass block
Stone	Granite, basalt, limestone, dolomite, sandstone, marble
Ceramics & Metals	Porcelain, wall/floor tile, sanitary ware, aluminum, stainless steel
