

Vacuum Cleaner Component Set

This component set includes various parts for vacuum cleaner maintenance. It consists of flexible hoses, extension wands, connectors, and motor assemblies designed for high-performance suction.

Product Overview

Comprehensive Vacuum Maintenance Kit

This versatile vacuum cleaner component set is designed for both household and industrial maintenance applications. The kit includes high-performance motor assemblies, flexible corrugated hoses, and durable extension wands, ensuring compatibility with a wide range of cleaning equipment. Engineered for reliability, these components are essential for repairing and extending the service life of your vacuum systems.

Technical Specifications

Included Model Variants

- DW0600
- DW0601
- DW0602
- DW0603
- DW0604
- DW0605
- DW0606
- DW0607
- DW0620
- DW0621
- DW0622

Included Components

Flexible Hoses • Extension Wands • Connectors • Motor Assemblies

Design Characteristics

- Corrugated hose design for flexibility
- Durable construction materials
- High-performance suction motor assemblies

Application Suitability

Household, Industrial, Maintenance, Repair
