

Vacuum Cleaner Disposable Dust Bag

This disposable dust bag is designed for use in vacuum cleaners. Constructed from multi-layer filtration material, the bag captures fine particles and dust, preventing recirculation into the air.

Product Overview

High-Efficiency Filtration

This disposable dust bag is engineered with multi-layer filtration material to effectively capture fine dust and allergens. Its robust design ensures particles are contained, preventing recirculation into the air during vacuuming. Featuring a standardized cardboard collar, it offers easy installation and removal, maintaining optimal machine hygiene and airflow performance.

Technical Specifications

Design Features

- Cardboard collar attachment
- Fine particle containment
- Quick-release replacement system

Material Composition

Multi-layer filtration, Disposable

Usage Benefits

Operational Performance

100 %

Filtration Efficiency
