

Vacuum Cleaner Disposable Dust Bag

This disposable dust bag is designed for use in vacuum cleaners. Constructed from durable, multi-layered filtration material, it captures fine dust particles, allergens, and debris.

Product Overview

High-Efficiency Filtration

This disposable dust bag is engineered from multi-layered filtration material designed to capture fine dust, allergens, and debris effectively. Its design ensures optimized airflow and consistent suction performance for vacuum cleaners. The intuitive collar mechanism allows for hygienic and quick installation, providing a clean solution for maintenance.

Technical Specifications

Design Features

- Secure collar flange
- Optimized airflow structure
- Hygienic disposable design

Filtration Capability

Fine dust, Allergen reduction, Debris capture

Construction

Multi-layered filtration material

Performance

Performance Metrics

100 %

Dust Recirculation Minimization
