

Vacuum Cleaner Filter Net

This filter net is designed for wet and dry vacuum cleaners. Its pleated design maximizes surface area for superior filtration of fine dust particles, debris, and liquids.

Product Overview

High-Performance Wet & Dry Cleaning Solution

This versatile wet and dry vacuum cleaner is engineered for demanding cleaning environments, offering robust suction power and reliable performance. With a 1200W motor and HEPA filtration, it effectively handles both liquid spills and fine dust debris. The unit features a substantial 20L metal bucket capacity and includes a comprehensive set of accessories for various surface types.
