

Vacuum Cleaner Motor Assembly 1200W 220-240V

This high-speed universal motor assembly is designed for vacuum cleaner applications. It features a wound stator, balanced rotor, and carbon brushes for efficient and reliable performance.

Overview

High-Performance Vacuum Motor

This high-speed universal motor assembly is engineered specifically for vacuum cleaner applications, offering a robust 1200W power output. Designed with a wound stator and a balanced rotor, it ensures efficient operation and consistent performance. The inclusion of durable carbon brushes promotes a longer service life, making it a reliable component for various vacuum models.

Performance Metrics

Rated Power

1200 W

Power Output

25000 RPM

Rotational Speed

Operational Benefits

High Suction Power • Efficient Dust Collection • Wear Resistant • Easy Installation

Electrical Specifications

Voltage

220-240V

Construction & Design

Maintenance Components

- Carbon Brushes included

Design Highlights

Universal Motor, Wound Stator, Balanced Rotor, Compact Design
