Product Overview

High-Performance Vacuum Cleaner Motor

This high-performance vacuum cleaner motor is engineered for powerful suction and reliable, efficient operation in various appliance models. It features a robust construction with a durable housing, balanced armature, and high-quality windings to ensure an extended operational lifespan. With its compact design and included electrical leads, this motor provides easy integration for both original equipment assembly and replacement applications.

Technical Specifications

Key Performance Metrics

1 optimized
Airflow Efficiency

0 reduced
Vibration Level

Core Features

- Robust durable housing
- Balanced armature for stability
- High-performance windings
- Compact installation design
- Integrated electrical leads

Application Compatibility

Suitable Applications

Replacement Part, New Appliance Assembly, Home Appliances
