

Vacuum Cleaner Wet and Dry Motor

This AC motor is designed for wet and dry vacuum cleaners. It provides powerful suction and reliable performance in both wet and dry environments.

Product Overview

High-Performance Vacuum Motor

This high-performance AC motor is specifically engineered for use in both wet and dry vacuum cleaners. Its robust construction ensures long-term durability and consistent, reliable operation in demanding environments. Designed for optimal airflow and reduced noise levels, it provides powerful suction capabilities suitable for a wide range of professional and residential vacuum applications.

Performance Metrics

Key Performance Features

- Powerful suction performance
- Optimized airflow design
- Reduced noise operation
- Robust construction for durability

Application Compatibility

Wet Vacuum, Dry Vacuum

Technical Specifications

Motor Type

AC Motor
