

Vacuum Insulated Tube

This evacuated tube has a transparent outer tube with a 84mm diameter, and a 37mm inner tube. It is designed with internal components including a coated reflector and fasteners for thermal insulation and efficient energy transfer.

Product Overview

High-Efficiency Vacuum Insulated Tube

This vacuum insulated tube is engineered for superior thermal insulation and efficient energy transfer applications. Featuring a robust design with an 84mm outer diameter and a 37mm inner tube, it integrates a precision-coated reflector for enhanced performance. The assembly includes specialized fasteners to ensure stable support and reliable operation in demanding environments.

Technical Dimensions

Outer Tube Diameter	84 mm
Inner Tube Diameter	37 mm

Key Features

Component Highlights	Coated Reflector, Vacuum Insulation, Support Fasteners
----------------------	--

Performance Metrics

Core Metrics

84 mm Outer Diameter	37 mm Inner Diameter
