

Vacuum Pump

This vacuum pump is designed for industrial applications. It provides efficient and reliable performance for various processes.

Product Overview

Professional Commercial Vacuum Pump

This commercial-grade unit is engineered for reliable, high-volume performance in professional environments. Built with a durable stainless steel body, it ensures long-term sanitation and robust operation. Featuring intuitive controls and integrated monitoring, this solution is designed to streamline workflows and maintain consistency in demanding settings.

Technical Specifications

Operating Scale

- 25
- 30
