

Vacuum Sealing Machine for Food Packaging

This vacuum sealing machine is designed for packaging and preserving food items. It removes air from packaging to create an airtight seal, which extends the shelf life of the packaged contents.

Product Overview

Professional Food Preservation

This countertop vacuum sealing machine is designed to efficiently remove air from packaging, creating an airtight seal that significantly extends the shelf life of food items. Its compact design makes it suitable for both home and small-scale commercial environments. Featuring intuitive controls for sealing and vacuuming, this unit provides a reliable solution for maintaining freshness and quality in food packaging workflows.

Technical Specifications

Control Panel Functions

- Seal
- Seal time adjustment
