

VAG Diagnostic Cable for Opel Immo Airbag Systems

Diagnostic cable facilitates communication with a vehicle's electronic control units (ECUs). It is designed for reading and writing data, performing diagnostics, and accessing immobilizer and airbag systems.

Product Overview

Professional Vehicle Diagnostic Solution

This advanced diagnostic tool is designed for comprehensive interaction with VAG and Opel vehicle systems, including immobilizer and airbag modules. It provides technicians with the ability to perform complex tasks such as reading PIN codes and changing mileage directly via the OBD connector. Engineered for efficiency, the tool supports a wide range of vehicle models produced up to 2005.
