

VAG Diagnostic Interface Cable for VW/AUDI

Diagnostic cable designed for VW/AUDI vehicles, facilitating communication with the vehicle's computer system. This cable connects to the vehicle's OBD-II port and interfaces with a computer via USB.

Product Overview

Professional VAG Diagnostic Interface

This VAG Tacho USB 2.5 interface provides a robust solution for vehicle diagnostics and programming through the OBD port. Designed for seamless connectivity, the hardware is integrated directly into the OBD connector, enabling efficient communication between your computer and the vehicle's electronic systems. It is an essential tool for technicians requiring access to immobilizer data, PIN codes, and mileage adjustments on a wide range of VAG group vehicles.

Technical Specifications

Software Version	2.5
Connection Interface	USB to OBD

Supported Functionality

Core Operations	Mileage Adjustment, PIN Code Reading, EEPROM Programming, Immobilizer Access
-----------------	--

Compatibility Details

Supported Dashboard Manufacturers

- Bosch
- Motometer
- Magnetti Marelli
- VDO

Package Contents

Included Components

- Tacho USB 2.5 Interface
- Software CD Drive
