

VAG Diagnostic Interface Cable Kit

This diagnostic cable kit is designed for accessing and diagnosing VAG vehicle systems. It enables communication between a computer and the vehicle's ECUs for tasks such as reading diagnostic trouble codes and performing adaptations.

Product Overview

Professional VAG Diagnostic System

The VAG Dash CAN V5.14 is a specialized diagnostic interface designed for VAG group vehicles, providing professional-grade access to ECU data and immobilizer information. This tool supports a wide array of BOSCH engine control units, including EDC15, EDC16, and ME7 series, ensuring comprehensive system analysis. It is an essential utility for technicians performing tasks such as EEPROM adaptation, cluster reading, and immobilizer code retrieval.

Compatibility

Primary Diagnostic Functions

- ECU data reading
- Immobilizer box information retrieval
- VDO instrument cluster reading
- EEPROM adaptation channels access
- Idle speed offset adjustment
- SEL scaling

Supported ECU Types

BOSCH EDC15, BOSCH EDC16, ME7.5, ME7.1, ME7.5.1, ME7.1.1, MED 9.5

Technical Specifications

Supported Brands

Volkswagen • Audi • SEAT • Skoda

Model-Specific Notes

Vehicle Model/System	Technical Requirement/Capability
Golf Mark V (2003-2006)	Supports VDO instrument clusters
Passat B6	Immo info accessed via convenience module
Audi A4	Compatible with BOSCH RB4 clusters
New Beetle / Audi TT	Supports Magneti Marelli M73 clusters
1994-1998 Immobilizer	Requires adapted key in lock

Software Version

V5.14
