

VAG IMMO System Diagnostic Interface Cable

This interface cable is designed for VAG IMMO systems diagnostics and programming. It facilitates communication between a computer and the vehicle's immobilizer system, enabling key programming and adaptation.

Product Overview

Professional Immobilizer Diagnostic Interface

This diagnostic interface is designed for professionals to access VAG vehicles manufactured between mid-2000 and 2004 that utilize Immobilizer System 3. It enables efficient reading of security Login codes directly from the Engine ECU or Instrument Cluster, facilitating key learning and immobilizer adaptation. The device operates via K-Line diagnostics, ensuring reliable communication for BOSCH EDC15, ME7.1, ME7.1.1, and ME7.5 ECU models.

Technical Specifications

Production Years Supported	Mid-2000 to 2004
Compatible ECU Types	EDC15, ME7.1, ME7.1.1, ME7.5
Diagnostic Protocol	K-Line

Compatibility

Non-Compatible Systems

- CAN Bus Diagnostic
- Golf-5
- Touareg
