Product Overview

Industrial Valve Solutions

This assortment features high-quality cast iron valve components, including bodies, connectors, and flanges designed for demanding industrial applications. Each part undergoes precise casting, machining, and protective painting processes to ensure durability and resistance to harsh operating environments. These components are engineered for secure, leak-proof integration into fluid and gas piping systems.

Technical Specifications

Nominal Diameter (DN)	50 mm
Pressure Nominal (PN)	16 bar
Material	Cast Iron

Manufacturing Process

Production Stages

- Precision Casting
- Mechanical Machining
- Protective Painting
