

# Valve Stems for Inner Tubes

Valve stems designed for inner tubes. The TZ6-30 and TZ5-33 models offer robust construction for secure sealing and reliable performance.

## Product Overview

### Professional Grade Inner Tube Valve Stems

These high-quality valve stems are engineered for reliable performance in demanding environments. Available in the TZ6-30 and TZ5-33 models, they provide secure sealing and easy maintenance for various inner tube applications. Their robust construction ensures long-lasting durability for professional industrial use.

## Technical Details

### Model Specifications

Model	Design Features
TZ6-30	Robust construction, large flat base, slotted stem
TZ5-33	Threaded stem, multiple sealing rings, hexagonal base

### Model Variants

TZ6-30, TZ5-33

## Key Features

### Key Benefits

- Secure sealing mechanism
- Durable construction for demanding environments
- Easy inflation and deflation design
- Wrench-tightening capability for model TZ5-33
