Product Overview

Professional Soldering Iron Gun

This variable power soldering iron gun is designed for versatile use, offering adjustable power levels to suit various soldering applications. It features a robust mica heating element that delivers reliable heat ranging from 300°C to 520°C. With customizable components including power plugs, cables, and tube materials, this tool is an adaptable solution for international markets.

Technical Specifications

Available Voltages

- 110V-130V
- 220V-240V

Operating Temperature

300 °C

Min Temp

520 °C

Max Temp

Rated Power Range

20W-80W, 30W-60W

Heat Mode

Mica heater

Design and Materials

Handle Material

Plastic

Customizable Components

Power Plug, Power Cord, Outer Tube, Soldering Tip

Logistics and Packaging

Bulk Shipping Specs

| Attribute | Value |
|---------------------|-------------|
