

Variable Speed Electric Power Drill

This electric drill is capable of drilling 6.5mm into steel and 9mm into wood. It features a variable no-load speed that ranges from 0 to 4500 RPM.

Product Overview

Professional Variable Speed Electric Drill

This versatile electric power drill is designed to handle a variety of drilling tasks with precision and efficiency. Featuring a robust 300W motor, it offers a wide variable speed range of 0 to 4500 RPM, making it suitable for both steel and wood applications. Its dual-voltage compatibility ensures reliable performance across different power environments.

Technical Specifications

No-Load Speed

4500 RPM

Max Speed

Rated Input Power

300 W

Performance Capabilities

Drilling Capacity

Material	Max Diameter
Steel	6.5mm
Wood	9mm

Electrical Specifications

Voltage Support

110V, 220V

Frequency

50/60Hz
