

Variable Speed Impact Drill

This impact drill is engineered for diverse drilling tasks. It features variable speed control for accurate drilling and driving, along with a robust motor ensuring powerful performance and long-term durability.

Product Overview

HD13C Variable Speed Impact Drill

The HD13C is a high-performance impact drill engineered for versatility across various drilling applications. It features a robust motor designed for durability and consistent power, complemented by a variable speed control system that ensures precision during drilling and driving tasks. With an ergonomic design focused on user comfort, this tool is well-suited for extended professional use and demanding projects.

Technical Features

Key Features

- Variable speed control for precision
- Robust motor for high performance
- Ergonomic design for comfortable grip
- Suitable for professional and DIY use

Quality & Compliance

Certifications

ISO 9001:2008, CE, CB, SAA, EMC
